

Basmala Ahmed Mahmoud

Junior Data Analyst | Power BI | SQL | Python | Data Visualization
01121227280 | yoursarang2002@gmail.com | linkedin.com/in/basmala-ahmed-b55320358

Professional Summary

Computer Science student specializing in Data Science, with hands-on experience in data cleaning, data modeling, KPI development, and interactive dashboard design. Builds Power BI reports across sales, retail, banking, and economic data, using Power Query, DAX, SQL, Excel, and Python. Currently developing professional skills through the Digital Egypt Pioneers Initiative (DEPI), with a strong interest in turning data into clear, actionable business insights.

Technical Skills

Data Analysis & BI: Power BI, Power Query, DAX, Microsoft Excel (PivotTables, PivotCharts), Data Cleaning, Data Transformation, Data Modeling, KPI Development, Dashboard Design, Data Visualization.

Databases: SQL, Database Design, ERD, Relational Databases.

Programming: Python, Java, C, C++, C#, JavaScript, HTML, CSS.

Tools: Git, GitHub, Microsoft Office.

Experience & Training

Digital Egypt Pioneers Initiative (DEPI) — Junior Data Analyst Track | 2026 - Present

- Developing practical skills in data analysis, business intelligence, and data visualization using Power BI, Power Query, DAX, SQL, Excel, and Python.
- Building interactive dashboards and analyzing business datasets, from data cleaning and modeling to KPI development and insight generation.
- Developing freelancing and client communication skills for data analysis services.

Selected Data Analytics Projects

Amazon Sales Analysis Dashboard | Power BI, Power Query, DAX

- Cleaned and transformed a large Amazon sales dataset using Power Query.
- Built interactive KPI-focused dashboards analyzing sales performance, product categories, and order status.

Country Development & Economic Performance Dashboard | Power BI, Power Query, DAX

- Built an interactive dashboard comparing economic, demographic, health, and trade indicators across countries and regions.
- Designed a data model with fact and dimension tables and applied DAX for calculations, comparisons, and ranking analysis.
- Implemented slicers, maps, KPIs, and drill-through analysis.

Superstore 2019 — Sales & Operations Analytics | Power BI, Power Query, DAX

- Cleaned and transformed data, built a structured model, and developed DAX measures including Total Sales, Total Profit, Profit Margin, Running Total, and YoY Growth.

Seoudi Orders — Retail Sales Dashboard | Power BI, Power Query, DAX

- Designed a star schema, cleaned data, and developed measures for Total Sales, Total Cost, Total Profit, Profit Margin, and

AOV.

Bank Misr — Interactive Performance Dashboard | Power BI

- Developed an interactive KPI-focused dashboard for monitoring business performance.

Other Projects

Hotel Management System — ERD and relational database structure.

N-Queens AI Solver (Python) — algorithmic solution to the N-Queens problem.

Market Website (HTML, CSS, Java) — web-based market project.

System Management System (Java) — management application.

Education

Helwan National University — B.Sc., Faculty of Computer Science (Data Science)

Expected Graduation: 2028

Relevant coursework: Data Analysis, Database Systems, Data Science, Programming, Computer Science Fundamentals.

Certifications

IBM — Data Fundamentals

Digital Egypt Pioneers Initiative (DEPI) — Junior Data Analyst Track

Oracle — AI for You Training and Assessment (Learning Path completed)

Languages & Soft Skills

Arabic (Native) | English (B2, Upper-Intermediate) | Chinese (HSK 2)

Analytical Thinking | Problem Solving | Attention to Detail | Communication | Teamwork
